

MOHSINA ALIMA

Full-Stack Developer • Frontend Engineer • AI Integration

+91 9798941815 • mohsinaalima2006@gmail.com • [linkedin.com/in/mohsina-alima](https://www.linkedin.com/in/mohsina-alima) • github.com/mohsinaalima
• New Delhi, India

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL

Frontend: React 19, Next.js, Tailwind CSS, Zustand, React-Dropzone, pdfjs-dist, HTML5, CSS3

Backend: Node.js, Express, FastAPI, REST APIs, JWT Authentication, Google OAuth

Databases: PostgreSQL (Neon DB), MySQL, MongoDB | ORM: Prisma

DevOps: Docker, Git, GitHub, GitLab, Vercel, Render, Cloudinary CDN

AI / Tools: Puter.js, AI-powered PDF analysis, Postman, Prisma ORM

PROJECTS

PicScale — Distributed Image Platform & Monorepo | [Live Demo](#) | [GitHub](#)

Next.js • Node.js • Express • TypeScript • PostgreSQL (Neon DB) • Prisma ORM • Cloudinary • Render

- **Architected a three-service monorepo** separating a Next.js frontend client, a Node.js/Express API gateway, and an isolated background worker microservice — keeping each concern independently deployable and maintainable.
- **Designed relational schemas with Prisma ORM** against a cloud-hosted Neon PostgreSQL instance, then built a Cloudinary CDN pipeline with runtime transformation parameters to serve optimally sized images on demand.
- **Resolved a Render Linux sandbox execution block** by explicitly triggering binary generation through the Node engine loader and routing dummy HTTP endpoints for worker health checks — unblocking deployment without changing the core architecture.
- **Implemented a background worker microservice** that handles image processing jobs asynchronously, keeping the API gateway responsive under upload load.

AI-Resume-Analyzer — AI-Driven Career Tool | [Live Demo](#) | [GitHub](#)

React 19 • TypeScript • Puter.js • pdfjs-dist • Zustand • Tailwind CSS

- **Built a browser-based AI feedback engine** using React 19 and Puter.js that reads an uploaded PDF resume, sends its parsed content to an LLM, and streams structured feedback to the user in real time — no backend server required.
- **Implemented a multi-layer PDF text extraction pipeline** with pdfjs-dist, achieving consistent content parsing across varied resume formats and encoding styles.
- **Designed a drag-and-drop file intake UI** with React-Dropzone and managed global UI state through Zustand, eliminating prop drilling across the component tree and keeping interactions snappy on large documents.

kidsportal — Interactive Learning Platform | [GitLab Repository](#)

React • Vite • Tailwind CSS • FastAPI • Python • MySQL • JWT • Google OAuth

- **Engineered end-to-end authentication** with FastAPI on the backend and JWT + Google OAuth on the React frontend, covering secure session management, token refresh, and protected route guards.
- **Designed the MySQL relational schema** to efficiently manage user profiles, authentication state, and dynamic video content — structuring tables to support personalized learning feeds without redundant joins.
- **Built a 'Cognitive Game Engine' and Watch History dashboard** using React's useState and useEffect to maintain real-time game state and media progress across user sessions without page reloads.

EDUCATION

Jamia Hamdard University, New Delhi 2023 – 2027

Bachelor of Technology — Computer Science & Engineering (Expected May 2027)

Coursework: Data Structures & Algorithms (C++), OOP, DBMS, Operating Systems, Computer Networks, System Design
